Ministerio de
Ciencia, Tecnología
e Innovación Productiva
Presidencia de la Nación

Presidencia de la Nación

The Ministry of Science, Technology and Productive Innovation was created in December 2007 and is the only one of its kind in Latin America to contemplate Productive Innovation associated to Science and Technology. Its mission is to intertwine these three elements to achieve a new productive model that generates greater social inclusion and a better quality of life for the Argentinean People.

Its actions are materialized in:

Investment: In 2010 the budget for science and technology sector amounts to more than 2 billion Pesos.

Stimulus: More than 800 Argentinean scientists have returned to collaborate with those who are doing science in our country.

Training: Human resources training aims at meeting the demands of knowledge that requires a new techno production pattern.

Management: Organizations and institutions of science and technology form an integrated network, thus achieving a more efficient system.

Production: Technology-based innovation as well as the incorporation of science in the productive culture of Argentinean enterprises is promoted.

Integration: Knowledge transfer helps to establish a balanced development throughout the national territory.

Dissemination: Scientific and technological actions are promoted to raise awareness in the people on the value of knowledge.
